

# TRIPLOCK®

## NEW WORLDWIDE PATENTED PAIL SERIES FROM ABATE

### SAFETY CLOSURE

**TRIPLOCK®**

**TRIPLE LOCK CLOSING  
SYSTEM WITH TEAR OFF  
BAND**

Triplock® brings together 25 years of research and development in seals for special containers. Such sealing system provides containers/lids with unrivalled performance with equal weight. Designed to make the most of the extremely beneficial IMA® technology. It uses 3 seals and 1 optimised strip off band.

 **TRIPLOCK®** and  **IMA®** : the perfect union

**IMA®**

**INTEGRATED HANDLE  
ASSEMBLY DIRECTLY MOULDED  
IN/WITH THE CONTAINER**

The IMA® technology, covered by an exclusive international patent registered by Abate Basilio, has been specifically designed for handled containers. No labour is needed to assemble the two parts together, so the production cycles can be optimised 24/7. There's a tangible advantage in terms of production: no extra moulds or presses are required in addition to the handle; the mechanical system rules out any error, it offers greatest flexibility, energy savings and customised storage and moulding solutions.
